SUMMARY

Creative and detail-oriented Web Developer focused on frontend design and user experience. Skilled in building responsive, visually appealing web pages using modern frameworks and templates. Adept at turning content into clean, intuitive interfaces with scalable backend support. Passionate about blending aesthetic design with functionality for seamless user experiences.

EDUCATION

Master of Computer Application (MCA)   **2024 - 2026**
Jamal Mohamed College
Percentage : 81 %

Bachelor of Computer Application (BCA)   **2021 - 2024**
Jamal Mohamed College
Percentage : 83 %

INTERNSHIP [FABS INFOTECH]   **Feb 2025 - May 2025**

I completed an internship at Fabs Infotech, Dubai, where I contributed to the development of an ERP website using Python, Django, and PostgreSQL. My role involved customizing templates and enhancing existing modules to meet client requirements. This experience allowed me to strengthen my full-stack development skills through practical, hands-on project work.

PROJECTS

1. Outcome Based Education (OBE)   **Jul 2024 - Jun 2025**
An OBE system implemented for over 10500 students and 510 staff. It manages and calculates CIA students internal marks for 50,000+ records in a centralized database, ensuring the data accuracy and streamlined academic analysis and reports. This live system is currently used at Jamal Mohamed College for real-time OBE mark entry.

2. Product Ordering and Quotation Management (UPVC)   **Dec 2024 - Apr 2025**
A full-featured quotation system for managing doors windows and louver orders. Supports customer profiles printable quotes report generation and order tracking. The system simplifies the order process and ensures consistent professional customer interaction. This live system is currently used at Champion products company.

3. Charitable Trust (AL Muhmin Islamic Trust)   **Nov 2025 - Present**
A secure trust management platform for tracking member contributions and donation distributions. Includes date-wise entry, fund balance monitoring, and personalized member dashboards. An admin panel ensures centralized control of operations and records. This live system is currently used by the Trust Management committee.
